

CCNA Training Case Study

The Challenge

Mountain View-Los Altos Union High School District (MVLA) required some Cisco training classes that could be offered to their students to train them to better equip themselves with the latest trends and technologies and to be able to obtain entry level positions such as Network Technician, Network Engineer, and other technical positions.

Location: Mountain View, California

Website: <https://as.mvla.net>

Our Solution

Accend provided a CCIE to teach the Cisco Interconnecting Cisco Networking Devices Part 1 and Part 2 according to the Cisco course syllabus. These courses helped to prepare them for the Cisco CCNA Routing and Switching.

The Results

Accend was able to teach and train a classroom of up to 10-12 students per class and provided training according to the Cisco ICND1 and ICND2 course curriculum, and also industry best practices training and use cases so students could apply them to the real world.

Live labs were also conducted and provided to the students.

Technology Covered

- Cisco Interconnecting Cisco Networking Devices Part 1 (ICND1)
- Cisco Interconnecting Cisco Networking Devices Part 2 (ICND2)
- Cisco CCNA Routing and Switching Certification Preparation
- Cisco best practices and real world examples
- Cisco Labs using Layer 2 and 3 switches and routers
