

# Azure Cloud Migration

## The Challenge

OneMain Financial (OMF) was experiencing some issues with migration of their on-premise firewalls to Azure Cloud. They had insufficient knowledge to support the Palo Alto Networks Firewall, BGP, and Azure virtual networks.

**Client:**

OneMain

**Location:**

Evansville, IN North Central Locations

## Our Solution

- Accend provided a CCIE Senior Network Engineer and Palo Alto Certified Network Security Engineer and to assist OMF with migrating their on-premise WAN gateways to Azure virtual gateways
- Assessed OMF their virtual Palo Alto Networks firewalls for proper configuration and according best practices prior to cutovers
- Assisted with reviewing the routing and BGP design to avoid any issues during the cutover
- Assisted with being available during and post-implementation phases

## The Results

- OMF was able to migrate their on-premise WAN gateways to Azure Virtual Gateways successfully
- OMF had a vetted virtual Palo Alto Networks firewalls for their migration
- OMF had a partner they could rely on
- Accend remains a trusted advisor to OMF
